MORGAN

Morgan Vise DISPLAY STAND

- SELL FASTER
- SELL EASIER
- SELL MORE

This attractive and sturdy display stand furnished to authorized distributors of Morgan Vises.

An attractive display of various types and sizes is an aid to the purchaser in making his selection resulting in more sales for the distributor.

The heavy gauge steel stand is all welded for extra rigidity and strength and it is finished in a rich gray color. It's normal capacity is 10 to 12 vises of assorted sizes. The stand requires a floor space of only 16" x 48". The unit weighs 80 pounds and is shipped fully assembled ready for use.

We will gladly furnish complete information upon request.

Why Morgan Vises ?

Since 1892 the entire engineering and production facilities of The Morgan Vise Co. have been devoted exclusively to the design and manufacture of vises. Smooth functional design, rigid control of materials, accurate machining and close inspection standards assure you of the best vises obtainable for factories, shops, schools and home workshops.

THE MORGAN GUARANTEE

Morgan Vises represent the finest quality in materials and workmanship that money can buy. We have no specified period of time for free replacement nor do we set a time limit on our guarantee. We will, however, stand behind any Morgan Vise which in our opinion shows any manufacturing or material defect. Merchandise will not be accepted for return unless authorized by the Morgan Vise Company.

Morgan . . .

MACHINISTS' BENCH VISES

SOLID JAW AND STATIONARY BASE

Dependable strength and extreme rigidity is obtained in the Morgan line of machinists' vises, by the use of a special semi-steel casting and the accurate milling of the sliding bar to snugly fit the broached opening in the base. The jaws are milled parallel and have interchangeable tool-steel faces which may be renewed when battered or worn thus adding years to the life of the vise. The screw is a solid steel forging engaging in a malleable iron nut Acme threaded. This vise is unsurpassed for strength, rigidity and durability. All parts interchangeable.

Handles are nicked for neater appearance.

Vise No.	Code	Width of Jaw, Inches	Jaw Opens, Inches	Wt., Lbs.
30	Abate	3	4	23
35	Abbey	3½	5	31
40	Abroad	4	6	43
45	Acast	4½	7	56
50	Accuse	5	8	74
60	Acor	6	10	138
80	Ardent	8	12	250

SOLID JAW AND SWIVEL BASE

All the strength and rigidity of our stationary base vises is maintained in the swivel base series by careful workmanship and close inspection; all engaging parts are milled to insure smooth and perfect working. This vise may be swung and clamped in any desired position; a specially designed nut for locking the base at any angle makes it impossible to turn the vise when in use and prevents any play which would destroy the rigidity. Our new and improved base gives a low construction which is very desirable. All parts are interchangeable.

Swivel base vises 5" and larger have double swivel locking attachment. Handles and Side Locks are nickel plated for neater appearance.

Vise No.	Code	Width of Jaw, Inches	Jaw Opens, Inches	Wt., Lbs.
130	Badge	3	4	32
135	Baden	3½	5	44

150	Balm	5	8	95
160	Bass	6	10	150
180	Ball	8	12	275

SWIVEL JAW AND SWIVEL BASE

The workmanship and finish of this vise is unsurpassed. Being carefully reinforced at the proper points makes it strong enough to withstand the roughest machine shop usage and as an asset to the tool room where fine work is done it is indispensable. The interchangeability of parts allows smooth faces to be inserted in the jaws for fine work when necessary. A specially designed nut for locking the base prevents any play which would destroy the rigidity.

Swivel base vises 5" and larger have double swivel locking attachment.

Vise No.	Code	Width of Jaw, Inches	Jaw Opens, Inches	Wt., Lbs.
335	Deacon	3½	5	43
345	Dealt	4½	6¼	75
360	Decay	6	9½	164

COMBINATION PIPE VISE, Swivel Base

The Morgan Combination Pipe Vise is constructed to embody the best features of our standard machinists' vise and the convenience of a pipe vise. It is very strongly built. The pipe jaws are milled from a high grade tool steel and the vise jaws have hardened tool-steel faces. This is a very convenient vise and very serviceable. All parts are interchangeable. Handles and Side Locks are nickel plated for neater appearance.

Vise No.	Code	Width of Jaw, Inches	Pipe Cap.	Jaw Opens, Inches	Wt., Lbs.
87	Finch	3½	2½	5½	48
88	Flag	4½	3½	6½	72

289½	Fast	6	6	10	185

MORGAN LONG JAW HINGED PIPE VISE

Made of high grade malleable iron and backed by the same guarantee as all Morgan Vises. Standard self-locking hook, cold rolled screw and handle, and oil tempered tool steel pipe jaws make this one of the finest pipe vises on the market.

Vise No.	Holds Pipe	Wt., Lbs.
2M	1/8 to 2 "	8
4M	1/8 to 2 1/2"	11
6M	1/8 to 3 1/2"	18
8M	1/8 to 4 1/2"	26

MORGAN "HOMECRAFT" VISE

This vise is built to the same standards as the regular utility line except that the pipe jaws are built in and the plain jaw faces are not hardened. Painted an attractive green.

4	4 "	4 1/2"	22	3
5	5 "	5 "	30	1

SHEET METAL WORKERS VISE

FORMERLY COACH MAKERS' VISE
SOLID JAW AND SWIVEL BASE

This vise is particularly serviceable in the woodworkers room as it is equipped with our regular swivel base which allows it to be swung into any desired position and locked securely, making it impossible to turn the vise when in use. The jaws are milled to parallel and the inserted unhardened tool-steel faces are ground to perfect smoothness to insure positive bearing.

Handles and Side Locks are nickel plated for neater appearance.

Vise No.	Code	Width of Jaw Inches	Jaw Opens, Inches	Wt., Lbs.
138	Gas	4 1/2	10	82

Morgan UTILITY VISE

MORGAN UTILITY VISE

The Morgan line of utility vises is available in a complete range of sizes for the home workshop. Rugged construction—finished in a bright red.

- Strong close grained gray iron casting.
- Extra large steel sliding bar.
- Removable steel jaw faces—hardened.
- Pipe jaws which may be removed when not needed.
- Acme threaded cold rolled screw, with one piece handle.
- A good substantial heavy base with positive side lock.
- Cut off tool.

BRASS CAPS FOR VISE JAWS

These caps are used to protect work from the regular corrugated jaw faces. They are made of brass and are put in place with finger prongs, holding them securely in place and yet are easily removed.

Morgan WOODWORKER'S VISE

New - DUAL PURPOSE VISE

A Continuous Screw Vise With Rapid Action Movement

Embodies an extra heavy cold rolled, buttress thread screw. Same high quality semi-steel castings coupled with skilled and accurate machining. Vise engages and disengages at any point, by a simple turn of the handle. Includes the best features of the continuous screw vise and gives you the advantages of a quick action vise. Adjustable stop built into front jaw. TUBULAR STEEL HANDLE.

18-A	7	4	9	30

MORGAN STEEL BENCH DOG

Cold rolled steel bench dog with ¾" diameter shank 2¼" long. Top is cold rolled stock 2¼" long, 1" wide and ¼" thick.

JUNIOR WOODWORKER'S VISE

Solid Nut continuous Screw woodworking vise with stop in front jaw. Made of semi-steel castings. Fully machined. Hardwood handle. Fits flush on standard 2¼ inch top.

Same fine quality of materials and workmanship that go into the manufacture of all Morgan Vises.

Packed one in a carton. Six cartons to one master carton.

Vise No.	Width of Jaw, Inches	Depth of Jaw, Inches	Jaw Opens, Inches	Weight Pounds
300A	7	3	7	17

SOLID NUT CONTINUOUS SCREW VISE

Designed and built to withstand the most severe service. The extra heavy Cold Rolled Screw and SOLID NUT will last a lifetime. Note the simplicity of construction; every part carefully machined and interchangeable cold rolled side bars threaded and held in place by hexagon nuts—not riveted. Fits flush on standard $2\frac{1}{4}$ " bench top. TUBULAR STEEL HANDLE.

-----	----	---	----	----

No. 210A and No. 215A Vise can be furnished with 12-inch opening at list price of \$1.00 additional.

All Morgan Woodworking Vises are built to fit flush on a standard $2\frac{1}{4}$ inch bench top. Vise bodies are held to an exact 90° angle permitting a tight fit between the vise and the bench top.

The working action of this vise is the most simple and effective of any of the screw adjusting type. The screw, having intercepted threads, operates in a half nut, a slight turn of the handle disengaging the screw and permitting jaw to slide back and forth at will. A turn in opposite direction engages screw with nut, holding the work firmly in place. The half nut is a high quality bronze casting, and all parts of the vise are carefully machined and finished.

These vises are furnished either with or without a stop in the front jaw. Every vise fits flush on a standard $2\frac{1}{4}$ " top.

There is absolutely nothing about this vise to get out of order. TUBULAR STEEL HANDLE.
